Angel E. Strizioli

Senior Full-Stack & Applied AI Engineer

Buenos Aires, Argentina · astrizioli@gmail.com · LinkedIn · GitHub

Summary

8+ years building web, mobile and backend systems across retail, fintech and media/live streaming. I lead teams as tech lead and principal engineer, setting architecture and standards and mentoring engineers, and I work AI-first with Claude Code and GitHub Copilot in daily production delivery. Currently pursuing a Master's in Artificial Intelligence at UDESA.

Skills

Applied AI: Claude Code, GitHub Copilot, AI-assisted refactoring, Automated testing, Machine learning (UDESA)

Frontend & Mobile: React, React Native, Next.js, TypeScript, Redux, Tailwind CSS, Flutter, Vue.js, Angular

Backend & Infra: Go, Node.js, Python, REST / BFF, Event-driven, AWS, Firebase, PostgreSQL, SQL, MongoDB, GitLab CI, Argo CD, Datadog

Leadership: Tech lead, Principal engineer, Team leadership, Mentoring & coaching, Architecture standards, Technical planning, Backlog prioritization, Agile (Scrum / Kanban), Stakeholder communication

Experience

Frávega — Principal Full-Stack Engineer

Consulting: React Native Tech Lead, Aug 2025 – Jan 2026

Full-time: Principal Full-Stack Engineer, Mar 2026 – Present

- Principal engineer on a large-scale web platform refactor with Next.js and Go.
- Built a new React Native app for sellers: shared mobile modules, a Tailwind design system and BFF services.
- Use AI-assisted development to speed up refactoring and raise test coverage.

Leadership: As tech lead, set the technical direction of a cross-functional squad: architecture, standards, delivery timelines and mentoring. As principal, define architecture layers and engineering delivery standards across the division. Introduced Claude Code and GitHub Copilot as the team's core AI toolkit and mentor engineers hands-on.

Tech: Next.js, Go, PostgreSQL, React Native, Tailwind, AI-assisted dev

Diamond Kinetics — Senior Software Engineer, then AI Engineering Consultant

Full-time: Senior Software Engineer, Oct 2024 – Mar 2026

Consulting: Software AI Engineering Consultant, Mar 2026 – Present

- Full-stack work on the SidelineHD live streaming platform across web and mobile.
- Focused on reliability, live-data performance and creator experience.
- As a consultant, building automated workflows with Claude and delivering production full-stack and mobile features with AI-assisted engineering practices.

Leadership: Mentored engineering peers and worked closely with product and design owners. Improved developer tooling and test automation coverage for the team.

Tech: React, React Native, Python, Firebase, PostgreSQL

Tenet Software — React Native Team Lead

Consulting: React Native Team Lead, Aug 2023 – Sep 2024

- Delivered media streaming apps for Apple TV, Android TV, Roku, Amazon Fire TV (Fire OS), Android and iOS.
- Built a Roku streaming app from scratch.
- Automated release and app-store compliance pipelines.

Leadership: Led the team end to end, from delivery planning to global app-store distribution. Coordinated release pipelines and store-compliance submissions.

Tech: React Native, Roku, Fire OS, Apple TV, Android TV

Wibond — Senior Software Engineer / React Native Lead

Full-time: Senior Software Engineer / React Native Lead, Aug 2022 – Oct 2024

Consulting: Senior Software Engineer, integration project, Feb 2025 – May 2025

- Delivered a virtual wallet and a Buy Now Pay Later app for Android and iOS with React Native, Redux and Sagas.
- Integrated Metamap, TAPI, TiendaNube, Shopify and Mobbex.
- Built Go microservices on AWS, including a production service integrating PayWay (payments) and Koin (fraud prevention).
- Built a transactional payment portal (Next.js, Tailwind) and a modular customer portal (Angular).
- Designed and automated the test layers (Jest, React Native Testing Library).

Leadership: Led the core React Native team, owning delivery of the wallet and BNPL apps. Owned technical discovery and product architecture across partner integrations. Aligned multi-regional stakeholders on requirements, encryption security and incremental rollout plans.

Tech: React Native, Go, PostgreSQL, AWS, Next.js, Angular, Redux Saga

Leniolabs — Senior React Native Developer

Full-time: Senior React Native Developer, Jan 2022 – Aug 2022

- Developed a highly regulated loan origination app for the U.S. market (Ellie Mae client).
- Wrote compliance-ready unit tests and worked across backend, engineering and regulatory compliance teams.

Tech: React Native, Redux Saga, Jest

Telecom Argentina — Software Developer

Full-time: Software Developer, Jul 2021 – Jan 2022

- Contributed to the PersonalPay virtual wallet for Android and iOS.
- Wrote automated unit tests with Jest; partnered with UI/UX and QA to secure production quality.

Tech: React Native, React, Node.js, Jest

Open Pass — Frontend Developer

Full-time: Frontend Developer, Nov 2020 – Jul 2021

- Built white-label enterprise virtual wallet solutions with React Native, React and Flutter.
- Improved codebase modularity and quality through testing architecture and detailed code reviews.

Tech: React Native, React, Flutter, Redux Saga

FCA (Stellantis) — Junior Full-Stack Developer

Full-time: Junior Full-Stack Developer, Nov 2019 – Nov 2020

- Selected for the internal innovation team of Fiat Chrysler Automobiles (now Stellantis).
- Built experimental React, React Native and Node.js solutions for product infrastructure and user-facing performance problems.

Tech: React, React Native, Node.js

MakeTechnology — Junior Software Developer

Full-time: Junior Software Developer, Jan 2019 – Jul 2019

- Owned client-facing frontend development with React.js and Vue.js.
- Maintained the main company web properties and custom UI component libraries.

Tech: React, Vue.js

Personal projects

GlobalScout — https://globalscout-chi.vercel.app

Multi-sport scouting platform

Scouting platform for youth and amateur sport, built as a full-stack TypeScript monorepo with a Postgres + pgvector backend and end-to-end tests with accessibility checks.

Tech: TypeScript, PostgreSQL, pgvector, Supabase, Playwright

playerrec — https://playerrec-demo.vercel.app

UDESA Master's in AI · Machine Learning II

Football player recommendation that stays robust with small samples and missing data: a self-supervised encoder, embedding uncertainty and a blend governed by that uncertainty. Includes a scouting view and a lab that visualizes the algorithm. Built with two teammates on anonymized public data.

Tech: Python, Self-supervised learning, Embeddings, Uncertainty

Movie & series recommender — https://ingsoft-recomendador-web.vercel.app

UDESA Software Engineering

Users rate movies and series, build lists, follow people and get personalized recommendations with the reason behind each one, from a hybrid ML model. Built with a team workflow of PRs, hooks, multi-level tests and CI/CD.

Tech: Hybrid ML model, Python, CI/CD, Vercel, Fly.io

Felix Sandwichería — https://felix-sandwicheria.onrender.com/

Restaurant CRM · real product

CRM for a restaurant: orders arrive through a WhatsApp bot and land in a live kitchen dashboard, with menu and stock admin behind a staff login. Node.js bot, React dashboard and Supabase. Staff-only app: the demo opens at a login screen.

Tech: React, Node.js, Supabase, PostgreSQL, WhatsApp (Baileys), Render

Education

- **UDESA** — Master's in Artificial Intelligence (in progress): machine learning and intelligent data-driven systems.
- **UADE** — Informatics Engineering (2017 – 2023); Computer Analyst and Software Development Technician (2017 – 2022).
